Improving the quality of life for patients

Set the strategic direction for our Enabling Health strategy, aiming to increase the accessibility of treatment and care to improve patients' quality of life in countries where we operate.

Committing to 1.5°C

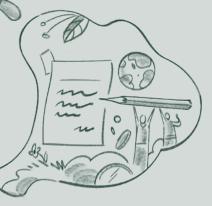

Submitted our climate targets to the Science Based Targets initiative. Our targets are set to align our entire carbon footprint with the 1.5°C pathway.

Set supplier engagement target for our value chain submission: Ensure that 75% of suppliers by emissions have set science-based targets by 2026.

Linking financing to sustainability targets

Refinanced loan facilities, linking a DKK 11.2 billion loan to our Scope 1 & 2 and 3 climate targets – and gender diversity targets for senior and middle management.

Practicing flexible working

Introduced a global flexible working policy to enable smarter work practices and support the needs of a modern company and workforce post COVID-19.

CEO LETTER

Enabling healthwhile growing our business responsibly

2021 MARKED the second year of the global COVID-19 pandemic. Constrained healthcare and increasing demands on services and solutions, beyond COVID-19, have accelerated the demand for sustainable healthcare systems. At the same time, the climate crisis provides us with the urgency of reducing our global carbon footprint in line with the latest climate science. Our sustainability approach is designed to respond to the societal challenges faced by our business - now and in the future.

At LEO Pharma, supporting the development of sustainable healthcare is a major driver of our competitiveness, and we are committed to taking action. Driven by the promise of leading new medicines for people with skin conditions, we advance the standard of care for the benefit of people with skin conditions, their families and society. We want to improve the quality of life of people who have poor or no treatment options.

LEO Pharma's Enabling Health strategy is responding to precisely this need by increasing the accessibility of innovative treatments and care to improve patients' quality of life in countries where we operate. Towards 2030, we will demonstrate our positive impact on society, as we aim to reduce the burden of disease in medical dermatology and show how our company benefits people living with a dermatological disease.

While we strive to achieve our 2030 aspirations, we are also committed to growing our company responsibly, as reflected in our Sustainability Policy. Future proofing our business entails mitigating climate risks related to our operations, preparing our employees for the future of work and promoting ethical business conduct through our global organization and value chain. In 2021, we submitted our climate targets to the Science Based Targets initiative. We are dedicated to doing our part in addressing the climate crisis. I am proud of our ambition to reduce our CO_2 emissions in line with the level of decarbonization required to keep global temperature increases to 1.5°C – and that we have linked the refinancing of LEO Pharma to these targets.

Being a participant to the UN Global Compact, we are committed to upholding its Ten Principles, covering the areas of human rights, labor, the environment and anti-corruption – and we support the achievement of the UN Sustainable Development Goals.

Anders Kronborg, Acting CEO

This is our Communication on Progress in implementing the Ten Principles of the United Nations Global Compact and amount in heavily 1 Nations.

We welcome feedback on its contents.

The resources we depend on:

- 5,804 talented and dedicated employees
- · Raw materials, water, energy
- Financial capital: Reinvested revenue and funding from investors and credit facilities
- · Innovation culture

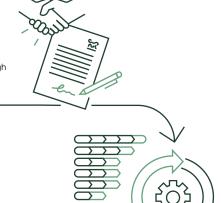

Pioneering early research

Exploring new indications, molecules and drug technology platforms aiming to provide first- and best-in-class assets - through own research and partnerships with academia and research alliances.

Acquiring external assets

Adding external assets to our pipeline portfolio through acquisitions and strategic partnerships.

Growth sparked by innovation

We are advancing the standard of care for the benefit of people with skin conditions, their families and society.

IMPROVING QUALITY OF LIFE for people with skin conditions is our greatest impact on society and supports the growth of our business. Our strong focus on bringing innovative new treatment solutions to market creates hope of improved quality of life for people who in the past had little or no treatment options for their condition.

Executing competitive, reliable and predictable supply for our treatments.

Manufacturing at our 6 sites, 22 CMOs and 11 API manufacturers.

Fit for purpose development

Developing innovative dermatology treatments according to pipeline composition and unmet needs.

Delivering our products via efficient supply chains.

Commercial execution

Marketing our treatments through own sales force and partners.

The value we bring to society:

- Improved quality of life for people with skin conditions
- New data on unmet needs and the burden of disease in medical dermatology
- Public/private partnerships
- Job creation
- Scientific progress

ENABLING HEALTH

Our pledge to enable health

We want to have a positive impact in health for patients and their caregivers.

•

HEALTHCARE systems are struggling with a growing burden of chronic diseases and related comorbidities in an increasingly older population, together with a global shortfall of healthcare workers. The situation is emphasized by the continued pressure from the COVID-19 pandemic, impacting and changing dermatology patients' accessibility to treatment and care. Changing environmental and climate conditions are also bringing new health challenges, or changed patterns of diseases, put-

Enabling Health embodies our purpose as it makes us focus our efforts on improving the quality of life for patients. It empowers our 2030 Strategy and contributes to long-term value creation for patients, society and our business, including the development of effective drugs as we innovate to changing framework conditions.

ting further strain on health systems and on people's health. There is a need to support the development of sustainable health systems in a rapidly changing world and the pharmaceutical sector has a role to play in resolving this global challenge.

Becki Morison,

Executive Vice President,

Global Therapeutic & Value Strategy

At LEO Pharma, we remain loyal to our purpose of advancing the standard of care in medical dermatology for the benefit of people with skin conditions, their families and society.

Our directions for Enabling Health

With the ambition to become a global leader in medical dermatology towards 2030, we aim to increase the accessibility of treatment and care to improve patients' quality of life in countries where we operate. We will work in three tracks, beginning small and SMART and gradually adding more and more activities to document how we deliver on this ambition.

- 1. Our societal impact: Initiatives with an impact on reducing the burden of disease where there is a high unmet need in medical dermatology.
- Our patient promise: Initiatives involving and benefitting people living with a dermatological disease.
- 3. Our practices: Building the external transparency and consistency of our internal practices.

We will report our impact on health measured by the change we make in the quality of life for patients where the unmet needs and the burden of skin disease are highest.

RESPONSIBLE BUSINESS

Operating responsibly

We are committed to operating with integrity and respect for our employees, the environment and our partners.

Being committed to operating responsibly with integrity and respect for our employees, our partners, and the world in which we operate, we find it natural to link our financing to a set of sustainability targets. Connecting our capital structure to our sustainability agenda offers very clear incentives to deliver on our targets within climate and diversity.

Information about our climate targets on pages 9 and 15.

Information about our diversity targets on page 18.

FIGHT FOR TALENT and against the climate crisis and corrupt business practices. The challenges facing the modern business world are many and call for the implementation of resilient programs and processes.

LEO Pharma's commitment to Responsible Business focuses on how we operate in an ethical and responsible way – and with integrity and respect for our surroundings. We prioritize the sustainability issues that are most material to the pharmaceutical sector and our business. In 2021, we identified ten issues important to delivering on our commitment towards 2025.

We will take a phased approach to the implementation of Responsible Business issues. Based on requirements from our shareholders and financial providers, upcoming regulation, tender requirements in the EU and our materiality assessment, we will focus our efforts on the following six issues towards 2023:

Diversity & Inclusion, Employee Health, Safety & Wellbeing, Climate Action, Ethical Business Conduct, Responsible Supply Chain and Data Privacy & Security. We have developed action plans to ensure progress and further integration with lines of business.

For the remaining four issues, Global Sustainability will work with the lines of business to review and develop ESG metrics to close data gaps and monitor performance.

Connecting capital structure to sustainability

In November 2021, we refinanced LEO Pharma's loan facilities. The loan aligns borrowing costs to our performance on agreed sustainability targets. In addition to traditional financial KPIs associated with the loan, we are committed to achieving our climate targets and targets for gender diversity in senior and middle management.

PEOPLE

A modern workplace

A DIVERSE AND INCLUSIVE organization fosters innovation, drives better decision making and has a positive impact on people engagement. While diversity is the mix of people and includes considerations such as age, gender, nationality, ethnicity, disability, sexual orientation and education, it is inclusion that unlocks the potential of diversity.

Our leaders are essential in fostering an inclusive culture, as they role model inclusive behavior and determine who is hired, developed and promoted. In 2021. we launched the first wave of Lead Inclusively, a threestep learning journey consisting of 1) essentials, 2) online sessions and 3) on-the-job activities to increase leaders' understanding of how to foster an inclusive culture and become more aware of their own biases. Of the leaders who participated, 98% reported the training to be relevant and that they would use what they learned. The next waves of Lead Inclusively will continue in 2022.

We believe that increased focus on diversity will help resolve our current gender imbalance in senior management. In 2021, the gender split in senior management was 34% women/66% men, while the gender split for all managers was 45% women/55% men. Both recruitments and promotions to senior management level contribute to the unequal split and if this trend continues, we will not meet our 40/60 split target for 2023. While the internal talent pool for senior management provides the opportunity for a 50/50 split at this level, we can see that it is more likely for a man than for a woman to get promoted.

While leaders are important to reversing this trend, our employees also play a key role in fostering the inclusive culture which we aspire to nurture. This is why we have introduced Ignite Inclusion: Step Up and Judge Wisely - voluntary social learning events for all employees focusing on what each of us can do to support a more inclusive culture at LEO Pharma.

92% of the employees who participated found that the session inspired them to think differently about diversity and inclusion

Practicing flexible working

With COVID-19, working remotely and increasingly virtually has become the new normal. While we have missed face-to-face interactions with our colleagues, COVID-19 has taught us new ways of working. Employee well-being is our focus, and we want to learn from the pre- and post-COVID-19 work experiences. In 2021, we introduced our global flexible working policy. We

Our flexible working policy is in line with our overall commitment to drive agility and efficiency. This is a natural step in maintaining our company as an attractive workplace for current and future employees.

> Dennis Schmidt Pedersen, **EVP Global People & Communications** and Chair of the Sustainability Board

offer and encourage flexibility for all to ease different life phases. Based on a guiding 60/40% mix, we give emplovees the opportunity to combine in-office and remote working. We also promote flexible schedules and increased use of virtual teams and management. We have started introducing activity-based office design to support new ways of working and foster innovation.

Keeping our employees safe during the pandemic

With the pandemic present throughout 2021, we continued to take necessary precautions to safeguard the health of our employees and ensure a continued supply of medicine to patients without disruption. We implemented measures to ensure business continuity in both the short and long term. At our headquarters, in the first half of 2021, we offered on-site COVID-19 testing of employees, while other manufacturing sites performed temperature screening of staff before they entered the sites. We promoted working from home and supported employees financially in improving their home workspace.

PLANET

A year of climate action

In 2021, we reduced our total CO₂e Scope 1 and 2 emissions by 25.7% and took the bold step of submitting our climate targets to the Science Based Targets initiative.

 $\sqrt{25.7}$ %

reduced our total

CO₃e Scope 1 and 2

emissions by 25.7%

compared to 2020

ACCORDING to the Science Based Targets initiative, it is still possible to limit the global temperature rise to 1.5°C, but we are dangerously close to that threshold. There is an urgent call to action globally. LEO Pharma is committed to contribute.

Setting science-based targets

The latest climate science provides us with the urgency of setting and achieving ambitious targets. Our climate targets are aligned with the Paris Agreement and aim to reduce Scope 1 and 2 emissions in line with the level of decarbonization required to keep global temperature increases to 1.5°C.

In 2021, we set a Scope 3 target for 2026. We committed to the Science Based Targets initiative in November 2021. With our climate target for Scope 1 and 2 emissions, we are committed to reducing our carbon emissions by more

than 50% from 2019 to 2030. For our Scope 3 emissions, our supplier engagement target is set to ensure that 75% of suppliers by emissions have set science-based targets by 2026.

Reducing CO₂ emissions

To achieve our carbon reduction targets, we need

enterprise thinking across our global organization. Our functional Climate Steering Committee consists of members from Global EHS, Global Engineering, Global Facility Management and Procurement Sustainability, Risk & Compliance and is responsible for providing

> a cross-functional overview of our climate action program as well ass collective advice and assurance to our Global Leadership Team on progress towards achieving the targets. And our progress is already visible.

> of moving away from coal power, re-40.3% compared to our 2019 baseline.

COP26 in 2021 stated the importance ducing methane emissions and accelerating the use of electric vehicles. By switching to electricity coming from 100% renewable sources, we reduced our total CO₂e Scope 1 and 2 emissions by 25.7% compared to 2020, and by

In 2022, we will continue to implement operational improvements to reduce our carbon and other areenhouse gas emissions. We will improve our energy efficiency and enhance energy monitoring at all sites, and also continue to electrify our car fleet. We will also focus strongly on our Scope 3 commitment and related cooperation with our suppliers and business partners.

rts

ETHICS

Building a strong culture of integrity

While we strive to achieve our purpose, it is critical for our success that we earn the trust of our stakeholders.

IN AN ERA of digital technology and regulation, companies are increasingly under pressure to protect data and ensure that it is used responsibly. Our 2021 materiality analysis confirmed that ethics and compliance, data security, innovation and digitalization are issues which are important to both our internal and external stakeholders.

Ethical business conduct

In 2021, we introduced a new Global Risk & Compliance strategy with the purpose of safeguarding our license to operate and supporting the business in fulfilling our corporate strategy while staying compliant and minimizing risks. The strategy is built on four elements:

- Establishing value-based policies and guidance to help drive a culture of integrity
- Embedding the policies in our global organization through training at global and local level and useful tools
- Enforcing our policies through testing and monitoring activities
- Ensuring that our third parties working on LEO Pharma's behalf follow LEO Pharma standards.

As one of the first steps, we relaunched our LEO Pharma Code of Conduct and related training for all employees globally. Our Code of Conduct guides our

LEO Pharma Code of Conduct

LEO Pharma Al Ethical Principles

actions and helps us make the right choices, as it defines values and policies and provides a common foundation for decision making. It helps us resolve ethical dilemmas and compliance issues by translating our values into consistent actions.

See page 21 for data related to training completion rates.

Using AI to support scientific advancement

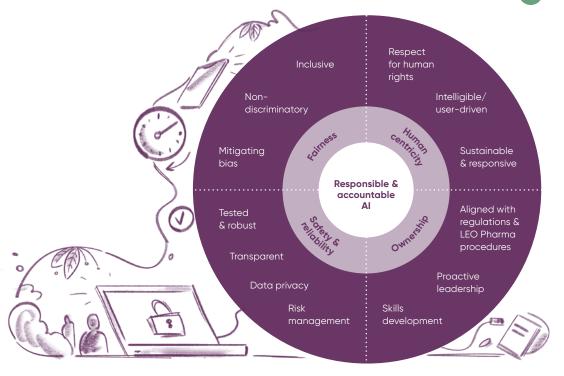

An example of how we apply ethical principles to our operations concerns LEO Pharma's use of Artificial Intelligence (AI). AI has the potential to transform pharma by accelerating efficiencies. AI can accelerate drug development, optimize clinical trials and automate tasks related to risk and pharmacovigilance. This transformation requires principles to support AI adoption and innovation, while guaranteeing the safety and fundamental rights of people and businesses.

Our new LEO Pharma AI Ethical Principles reflect our values and Code of Conduct, and our objective is to deliver responsible and accountable AI. All AI systems and solutions which we develop, employ or apply within LEO Pharma are governed by the following ethical principles: 1) Human centricity; 2) Fairness; 3) Safety & reliability and 4) Ownership & accountability.

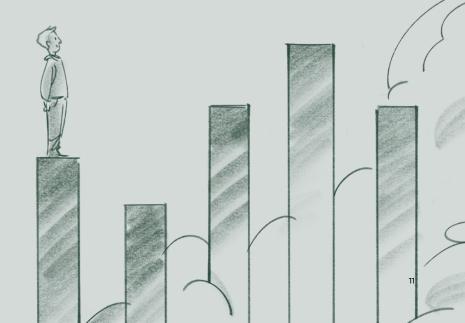

The principles complement relevant internal procedures and regulations applicable to LEO Pharma in relation to the use of data and digital systems.

We are already developing and implementing AI projects across the value chain. In January 2021, we launched Delphi, a new platform which focuses on using state-of-the-art machine learning to speed up drug discovery. It consists of a customized software application which allows our Drug Discovery team to train models to predict drug properties and features.

Similarly, iSearch is an intelligent platform supported by machine learning to help manage complex, text-heavy databases more easily and quickly. iSearch was born out of our Q&A Database, a pilot built to support the management of documents pertaining to marketing approvals. The platform can support a large number of databases simultaneously through a user-friendly, no-code interface for database administrators and users.

Our ESG performance

ESG reporting

Scope of our ESG reporting

Our ESG reporting represents LEO Pharma's compliance with Sections 99a, 99b and 99d of the Danish Financial Statements Act.

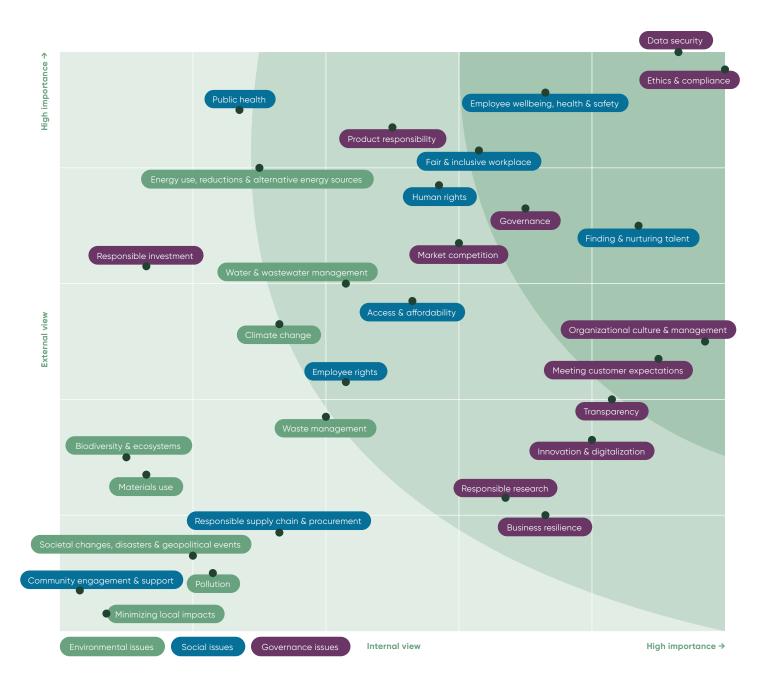

Our ESG data and progress overviews outline our approach, progress in 2021, policies and governance concerning material ESG topics for the financial year January 1 – December 31, 2021.

Identifying material issues

Once a year, we conduct a materiality assessment to understand which environmental, social and governance issues are most likely to impact the long-term success of LEO Pharma.

Since 2020, we have used a data-driven approach to prepare the materiality matrix, using the globally recognized analytics software Datamaran. By reviewing millions of data points from corporate reports, mandatory and voluntary regulations, news and social media, Datamaran's platform provides us with an overview of the issues which are important to our external stakeholders. We combine these insights with input from key external and internal stakeholders provided through surveys to complete our materiality matrix. For our internal stakeholders, we conducted workshops with senior leaders to validate survey results. Our materiality matrix and ranking of priority ESG topics are approved by LEO Pharma's Sustainability Board.

Our materiality assessment helps us define which issues it is relevant to report on, and serves as a guiding process for prioritizing our approach to managing potential ESG risks.

ESG reporting

12

Defining the most material issues

ISSUE	DEFINITION
Ethics & compliance	Fair, moral and transparent business conduct, including the evaluation and mitigation of non-compliance and fraud risks.
Data security	Efforts to safeguard and protect digital information from unauthorized access, corruption or theft.
Finding and nurturing talent	Hiring, managing, developing and retaining the right people with the right skills.
Employee wellbeing, health & safety	Social, economic, psychological, health, safety and physical conditions of employees in their workplace.
Organizational culture & management	The work culture, workforce management and employee satisfaction.
Governance	A company's management structure, policies and procedures that concern topics such as decision making, supervision and board structure.
Meeting customer expectations	Ensuring that the requirements of customers are met, including expectations of corporate reputation and sustainable production.
Fair and inclusive workplace	Growing and maintaining diversity in the workforce and ensuring equal opportunities and equal-pay-for-equal-work for all employees.
Transparency	Clear and honest reporting, communication and analysis of corporate performance and management.
Innovation & digitalization	Technological development and use of new products, services and business models, and innovation as a process.
Market competition	Competition based on the factors of price, quality, service and access to markets and measures to protect IP.
Human rights	The protection of basic human needs, such as freedom from slavery, civil liberties, right to privacy and right to health.
Product responsibility	Managing the environmental, social, health and safety impacts of a product across its lifecycle, including circular economy and marketing practices.
Business resilience	Risk and financial management to ensure that the impacts of disruption on the business are minimized.
Access & affordability	Efforts to provide equal access and affordable access to comprehensive, quality and timely healthcare for all.
Responsible research	Managing ethical challenges that may arise in research, includes ethics of clinical trials and animal welfare.
Water & wastewater management	Use, management and conservation of water resources, including the impacts of water pollution.
Energy use, reductions & alternative energy sources	Monitoring & reducing energy usage and increasing the use of renewable energy.
Employee rights	Legal rights regulating employee-employer labor relations.

ESG reporting •• 13

ESG risks

AS A BUSINESS with global operations, we are exposed to environmental, social and governance (ESG) related risks. Managing those ESG risks with the potential to impact LEO Pharma's business operations helps us mitigate business disruption and protect the value of LEO Pharma's assets.

Identifying ESG risk areas

We apply a systematic approach to assessing potential risk areas. Building on the Sustainability Accounting Standards Board's (SASB) Materiality Map for the pharmaceutical sector (likelihood) and our own materiality assessment (importance). we identify our top ESG risks related to the environment, social aspects, human rights and anti-corruption. For each of the risk areas, we assess the potential impact if the risk is not managed adequately through efficient treatment measures.

The ESG risk assessment is presented to members of the Sustainability Board. LEO Pharma's Global Sustainability team works with lines of business to implement adequate mitigating actions.

For an overview of our sustainability governance, see page 24.

KEY RISKS

ENVIRONMENT

Increasing energy prices

LEO Pharma depends on electricity and gas to produce treatments for patients. Throughout Europe, we are facing a significant increase in electricity and gas prices, as well as more volatile energy prices in general. All our manufacturing sites are located in Europe.

Financial impact on our operating profit margin and potential impact of business disruption in case of energy and gas shortages.

ACTIONS MITIGATING

Continuous improvements and implementation of energy efficiency projects at manufacturing sites to reduce usage of electricity and gas.

We perform energy hedging to protect against unexpected price increases.

SOCIAL

Access and affordability

Stakeholders expect pharma companies to have initiatives to enable equal and affordable access to treatment. Many of LEO Pharma's peers have programs in place to meet these expectations.

Reputational impact due to lack of transparency on access and affordability strategies and related actions.

With the purpose to improve patients' quality of life, our new Enabling Health strategy aims to increase the accessibility of treatment and care in countries where we operate.

SOCIAL

Discrimination and harassment are global issues that represent a threat to the well-being of employees and the productivity of a workplace. LEO Pharma works systematically to prevent disruptions related to any form of discrimination at our workplaces.

Reputational impact and

impact on ability to attract

cial impact of fines due to

breach of anti-discrimina-

tion laws

and retain employees. Finan-

Fair and inclusive workplace

HUMAN RIGHTS

Mandatory human rights due diligence

Countries worldwide are increasingly implementing legislation that requires companies to undertake mandatory human rights due diligence. We face a risk of non-compliance with new legislation, if adequate processes are not resourced to conduct our due diligence.

Interactions with third parties

ANTI-CORRUPTION

Corruption is a complex social, political and economic phenomenon that represents a significant threat to the global healthcare ecosystem. For LEO Pharma, there is an increased risk of corruption in our interactions with third parties, including healthcare professionals.

Reputational impact and possibility of fines or sanctions of breach for not fulfilling due diligence requirements.

Reputational impact. Violations of Anti-Corruption laws and regulations may not only result in major fines, but could also impact LEO Pharma's reputation.

Our Diversity and Inclusion strategy has a dual focus on inclusion: culture and structures. We review all key people processes to ensure they are inclusive in design, and bias blockers are incorporated when relevant to make it easy to be inclusive as the norm.

We have established a **Human Rights Working** Group to support the development of a consistent Human Rights Due Diligence process, and we conduct human rights impact assessments to identify actual and potential adverse impacts on human rights from our activities.

Our global Anti-Corruption efforts aim to ensure that all LEO Pharma employees have the knowledge to prevent and detect corruption, uphold high business standards and promote good business conduct when interacting with third parties.

ESG data and progress overview

Waste and water

Why is this important?	Managing our water use and the waste created by our manufacturing processes is critical to reducing our environmental impact and protecting natural resources.				
Our approach	We assess our water usage and waste risks due to increased production. We seek to manage the adverse impacts of our operations on water and employ robust waste management processes.				
Our progress in 2021	 Investigated circular economy alternatives for treating waste solvents at the Ballerup (DK) site. We delivered samples of solvents for the testing of suitability for reuse. Results expected in early 2022. Implemented waste sorting in offices from residual waste into bio, plastic and paper at Ballerup site. 				
Policies	 LEO Pharma Sustainability Policy LEO Pharma Environment, Climate and Energy Policy, part of the LEO Pharma Code of Conduct 				
Governance	Governed by selected members of LEO Pharma's Global Leadership Team as part of the EHS Management Review.

^{*}Updated compared to ESG key figures 2019-2020 in LEO Pharma Annual Report 2020

ESG data and progress overview

¹ We have concluded that the majority of our leased offices fall outside our operational control, and are therefore not included within Scope 2 calculations for 2019-2021. We will perform a full assessment of operational control over all leased offices in 2022, and expect there will be a recalibration of Scope 2 and Scope 3 emissions from leased offices.

² Revenue in 2021: DKK 9,957 million

³ Revenue in 2020: DKK 10,133 million

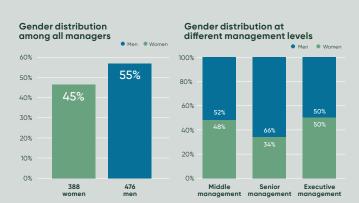

⁴ Revenue in 2019: DKK 10,805 million

ESG data and progress overview

Diversity and inclusion

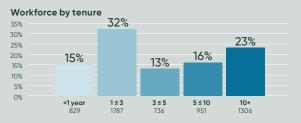

Why is this important?	A diverse and inclusive culture is an enabler of our 2030 Strategy as it fosters innovation, drives better decision-making and grows engagement across our organization.
Our approach	We promote a workplace where we treat employees with fairness, dignity and respect, regardless of gender, race, nationality, age, education, sexual orientation and other forms of diversity. To strengthen the gender diversity balance across all management levels, we have set targets for middle, senior and executive management levels. 2023 targets: 50/50 gender distribution in executive management 40/60 gender distribution in senior management 50/50 gender distribution in middle management
Our progress in 2021	 Launched our Diversity and Inclusion manifesto 'Curiosity beyond'. Introduced the Lead Inclusively leadership learning journey. Launched first wave of Ignite Inclusion social learning events for employees.
Policies	LEO Pharma Sustainability Policy LEO Pharma Diversity & Inclusion Policy
Governance	LEO Pharma Sustainability Board
Metrics	 Gender diversity in mgt (all, middle, senior, executive mgt) (%) Employees by gender (%) Joiners by gender (%) Internal promotion rate by gender (%) Employee turnover rate by gender (%) Workforce by age (%) Workforce by tenure (%)
SDG contribution	• 5 - Gender Equality

Our management population consists of 10 executive managers, 203 senior managers and 651 middle managers.

The age distribution of our workforce remained stable compared to 2020.

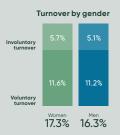

The tenure distribution of our workforce remained stable compared to 2020. $1 \le 3$ years of tenure is the most significant category.

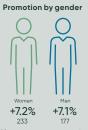

The overall gender balance remained stable compared to 2020.

The high percentage of women joining LEO Pharma influences our overall gender distribution.

Numbers of leavers (voluntary and involuntary) are 516 women and 376 men.

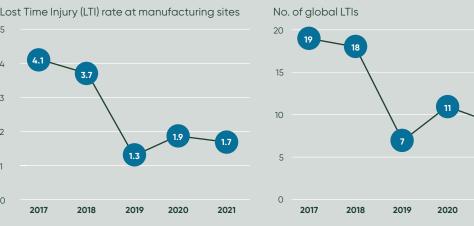

Close to even promotion rate between women and men.

Anti-corruption and Code of Conduct

Why is this Unethical business practices represent a threat to important? the global healthcare ecosystem. Ethical business practices are essential to maintaining efficient healthcare systems. There is an increased risk of corruption in our interactions with healthcare professionals and public officials. We do not tolerate any form of corruption. We Our approach promote good business conduct with customers, healthcare professionals, public officials and other business partners. We implement procedures to prevent and detect corruption in our operations. Our progress · Relaunched the LEO Pharma Code of Conduct in 2021 (CoC) and related training of all employees · Implemented new system for our Speak Up Line, replacing our Whistleblower Hotline. **Policies** · LEO Pharma Code of Conduct, incl. Anti-Corruption and Bribery Policy, supported by LEO Pharma's Speak Up Line, where internal employees and external stakeholders can report concerns. LEO Pharma relies on large quantities of data to develop innovative new solutions for the benefit of patients and society. Unethical use of data has the potential to harm both individuals and society and damage the trust we have built with our stakeholders.

LEO Pharma interacts with and relies on an extensive number of suppliers and business partners globally. To limit the risks of supply chain disruption, we promote responsible business practices in our supply chain.

Responsible supply chain

We aim to minimize the adverse impacts on both individuals and society, while leveraging the benefits of working ethically with data. Principles of accountability, autonomy, transparency, data quality, fairness and non-discrimination, ethics by design. responsible data sharing and data security guide our approach to ethical data use.

To ensure security of supply and assess risks of non-compliance in our supply chain, we conduct due diligence and monitor adherence to Sustainability Standards for LEO Pharma Business Partners. We support industry level collaboration to maintain responsible business practices in supply chains. We are an active member of the Pharmaceutical Supply Chain Initiative (PSCI).

- Developed a Data Ethics Policy to adhere to and guide the use of data in a responsible manner.
- · Introduced LEO Pharma AI Ethical Principles.
- Five EHS desktop audits conducted of CMOs/API suppliers.
- Screened 1080 suppliers. Sent 65 self-assessment auestionnaires.
- Engaged with 53 suppliers as part of our Supplier Engagement Program. Increased suppliers' knowledge of PSCI and available capacity building resources.
- Conducted environmental survey amona 100 suppliers. Response rate 81%. The survey is a collaboration with PSCI member companies to establish an industry benchmark for environmental performance and track progress.

Gender diversity at board level

Statutory report on gender diversity, pursuant to Section 99b of the Danish Financial Statements Act.

Our current goal is to have at least three female members of the Board of Directors of LEO Pharma A/S elected by the Annual General Meeting in 2021. This is in addition to the employee-elected board members. This goal was not achieved.

At the end of 2021, the total number of board members was eight. Only one of these was female as the other female board member did not stand for re-election during the year.

In 2021, following the change in ownership structure in Q3 2021, the board invited one new shareholder-appointed representative to be member, which in practice has not increased gender diversity.

At the Annual General Meeting in 2022, LEO Pharma will propose a new goal for gender diversity at board level. By the Annual General Meeting in 2024, at least three of the board members elected should be of the underrepresented gender (currently women). All candidate searches will involve shortlisting of female candidates.

Women in total represent 45% of management positions at levels below the Board of Directors of LEO Pharma A/S**.

*See pages 18 and 20 for an overview of gender representation at executive, senior and middle management level.

ESG data and progress overview

Human rights

We recognize our corporate responsibility to respect human rights.

We are committed to identifying and addressing any adverse human rights impacts resulting from our own operations or business relationships. We follow the guidance on human rights as defined by the UN Guiding Principles on Business and Human Rights, the Universal Declaration of Human Rights and the International Labour Organization's Declaration on Fundamental Principles and Rights at Work. As a participant of the UN Global Compact, we adhere to its Ten Principles, including principles 1 and 2 on human rights.

An integrating approach

In 2021, we established a cross-functional working group with representation from Global Public Affairs, Clinical Process Management, Global Risk & Compliance, Global EHS, Procurement Sustainability, Risk & Compliance, Agile Working and Global Diversity & Inclusion and Global Sustainability.

The purpose of the group is to strengthen our approach to human rights and support the embedding of a consistent human rights due diligence practice across LEO Pharma. To define a cohesive approach to a corporate human rights risk assessment, expanding on the high-level gap assessment conducted in 2020, the working group reviewed current approaches to risk assessment within the organization and defined the requirements to ensure alignment with the UN Guiding Principles.

The corporate human rights risk assessment was conducted as a self-assessment across six impact areas: 1) Research and development, 2) Procurement, 3) Health and safety, 4) Products, sales and

marketing, 5) Community impact, and 6) Employment practices. The data was collected at the end of 2021 and the analysis was completed in early 2022. The purpose of the analysis is to identify and address current or potential adverse impacts from our operations or business relationships. Due diligence is a dynamic process and maturity increases over time. We acknowledge that new, complex issues relating to human rights arise, with a commitment to review our salient issues regularly and identify appropriate actions.

Due diligence and human rights policies

We recognize the importance of continuously monitoring our potential human rights impacts through our due diligence process, including LEO Pharma's Speak Up Hotline. Our human rights due diligence approach and responsibility are integrated into relevant function level processes, to make sure we identify risks and manage these close to the business. The Speak Up Hotline, coupled with additional grievance reporting directed at line managers, gives employees and others associated with LEO Pharma the opportunity to report unethical behavior and serious concerns on a confidential basis.

Policies and governance

Several policies and statements relate to how we work with human rights. These include (but are not limited to):

- LEO Pharma Human Rights Policy
- LEO Pharma Code of Conduct
- LEO Pharma Protection of Personal Data Policy
- LEO Pharma Occupational Health and Safety Policy
- LEO Pharma UK Modern Slavery Act statement
- Sustainability Standards for LEO Pharma Business Partners
- Patient Safety (GXP Policy)
- Helsinki Declaration

^{*} Defined by the Danish Institute for Human Rights, 2013

Sustainability governance

Our sustainability governance model ensures clear accountability and anchoring of our 2030 sustainability strategy and targets.

THE BOARD OF DIRECTORS has authorized LEO Pharma's Global Leadership Team (GLT) to be accountable for sustainability performance. The GLT has appointed the LEO Pharma Sustainability Board, comprised of five GLT members and the Chief of Staff, to oversee the development and integration of LEO Pharma's sustainability strategy, including monitoring of the progress of sustainability performance and ESG targets.

The Board of Directors has authorized LEO Pharma's Global Sustainability Team to be responsible for developing the sustainability strategy and to support its implementation. Global Sustainability drives ESG management and reporting and serves as the secretariat for the Sustainability Board and Steering Committees and as advisors to issue owners and lines of business on the execution of sustainability.

Board of Directors

Receives annual update on sustainability and approves Annual Sustainability Report and sustainability related policies.

Chair: Jesper Brandgaard, Chair of the Board

Audit Committee

Approves Annual Sustainability Report.

Chair: Birgitte Stymne Göransson, Board member

Global Leadership Team

Approves sustainability strategy and accountable for sustainability targets.

Chair: Anders Kronbora, Actina CEO

Sustainability Board

Responsible for strategic sustainability performance and for integrating sustainability into core business functions and processes. The Board approves targets, ESG data for reporting and monitors performance against KPIs.

Chair: Dennis Schmidt Pedersen, EVP, Global People & Communications

Risk & Compliance Committee

Oversees the execution of LEO
Pharma's Enterprise Risk and Corporate
Compliance programs and related
activities, including providing periodic risk
reporting to the Global Leadership Team.

Chair: Maria Thestrup, Chief Risk and Compliance Officer

Enabling Health Steering Committee

Provides functional expertise on health. Advises on strategic direction and oversees the implementation of the Enabling Health strategy, including program development.

Climate Action Steering Committee

Provides functional expertise on climate. Advises on strategic direction, program development and implementation of roadmaps. Endorses targets and policies.

Issue owners in lines of business

Serve as subject matter experts. Drive progress on sustainability issues against action plans and track data to monitor performance.

ESG accounting principles

Boundary setting

Data related to employee safety, energy, waste and water covers the LEO Pharma manufacturing sites in Ballerup and Esbjerg in Denmark, Dublin and Cork in Ireland, Segrate in Italy and Vernouillet in France.

LEO Pharma headquarters are located at the manufacturing site in Ballerup.

Data collection period

Data was collected from January 1 – December 31, 2021.

ENVIRONMENT | SOCIAL | GOVERNANCE

letric Unit Accounting principle		
Tonnes	Sum of our CO_2 e Scope 1 and 2 emissions. See accounting principles for CO_2 e Scope 1 and 2.	
Tonnes	We follow the Greenhouse Gas (GHG) protocol corporate standard for calculating our CO ₂ e emissions and cover all direct emissions of greenhouse gases from LEO Pharma's operations.	
Tonnes	We follow the Greenhouse Gas (GHG) protocol for calculating our CO ₂ e emissions and for our Scope 2 report on both our market- and location-based emissions in line with GHG Protocol Scope 2 guidance.	
	We have concluded that the majority of our leased offices fall outside our operational control, and are therefore not included within Scope 2 calculations for 2019-2021. We will perform a full assessment of operational control over all leased offices in 2022, and expect there will be a recalibration of Scope 2 and Scope 3 emissions from leased offices.	
Tonnes	We follow the Greenhouse Gas (GHG) protocol for calculating our Scope 3 CO ₂ e emissions. This approach divides Scope 3 emissions into 15 sub-categories, an inventory approach that is used for all sub-categories. The sub-categories 11, 11a and 13 are not relevant for LEO Pharma and we do not have any greenhouse gases within these categories.	
	Our Scope 3 emissions data is one year delayed.	
Tonnes per DKK million	Greenhouse gas emissions intensity is calculated using the total Scope 1 & 2 (market based) emissions in tonnes divided by total revenue in DKK million.	
GWh	Energy consumption is measured as the consumption of electricity, natural gas, heat, steam and fuels used at our six manufacturing sites. Data is based on meter readings and invoices.	
GWh per DKK million	Energy intensity is calculated using the total energy consumption in GWh divided by total revenue in DKK million.	
%	Share of renewable electricity consumption is calculated according to the Greenhouse Gas (GHG) Protocol Scope 2 Guide- lines.	
m ³	Water usage is measured as the sum of water used at our manufacturing sites, based on meter readings.	
Tonnes	Waste is measured on the basis of the sum of waste disposal at our manufacturing sites and is based on data provided by waste management contractors. Waste by category covers: 1) Recycling, 2) Special treatment (incl. chemical waste and biological waste), 3) Incineration with/without energy recovery and 4) Landfill.	
	Tonnes Tonnes Tonnes Tonnes Tonnes Tonnes GWh GWh per DKK million % m³
